 - None of the above.
 - All of the above.

Use the following scenarios to answer questions 9-10:

- A regulated member is performing a test on a patient who is unconscious. While performing the test, the MLT makes a joke about the size of the women's breasts to a colleague. After a few minutes, another health provider informs the MLTs that the patient is aware of what is going on but cannot communicate.
- A regulated member from a rural community finds out that an individual in their community has cancer after performing their lab tests. The regulated member has never had a personal relationship with this individual but has seen them around town and knows who they are. A month later the regulated member sees this individual struggling in the grocery store and offers to lend a helping hand knowing that the individual's cancer is causing them some difficulty. This act of

kindness leads into a friendship and within a month the regulated member and the individual are in a loving sexual relationship.

iii. A regulated member takes on the role of preceptor to supervise a student. During the clinical practicum, the regulated member and student develop a sexual relationship.
